

Organization /Agency Related Issues

Bug# 1 On updation of Agency name and short name , Names disappear if user click back button

Actual: In Organization Name and Short name if the user will try to Update or change the name and then instantly click on the cross button then it is updating the name without clicking on saving and also saving empty field. Until Reload.

Expected: It should not update and get the old data back until click on save button or cross button .it should update Immediately without refreshing.

The screenshot shows a web application interface for managing organizations. The main window is titled 'gg' and has a close button. It contains two tabs: 'Information' and 'Active Apps'. The 'Information' tab is active. It displays a 'No Preview Available' message with a camera icon. Below this, there are two sections: 'Point of Billing' and 'Point of Contact'. The 'Point of Billing' section has fields for Name (Neer Jain), Email (.....neer@evisionits.....com), and Number (+917000211886). The 'Point of Contact' section has fields for Name (Neer Jain), Email (neer@evisionits.com), and Number (+917000211886). There are also buttons to '+ Add Point of Billing' and '+ Point of Contact'. The email field in the 'Point of Billing' section is highlighted with a red box.

#Bug 8

Actual Result -: In the members tab when user is assigning member in a team ,then the white space is not displaying in the member details team window.

Expected Results-: It should display white space in between names .

The screenshot shows the 'Members' tab in the application. It has a dropdown menu to 'Select Organization to view members' with 'Neerjain' selected. Below this are tabs for 'Active Member', 'Invited User', and 'Deleted Member'. A search bar and filters for 'Role', 'Team', and 'Last Access' are present. The table below lists members:

Name	Application	Team	Last Access	Membership Date

Admin Site API Bugs

1.Actual Result:- If trying to remove the client with API ,It is returning status as 500 Something went wrong.

Expected Result:- It should successfully remove the existing client id . if provided the existing id,and should return 200.

Parameters Cancel

Name	Description
clientId	
integer(\$int32)	40
(query)	

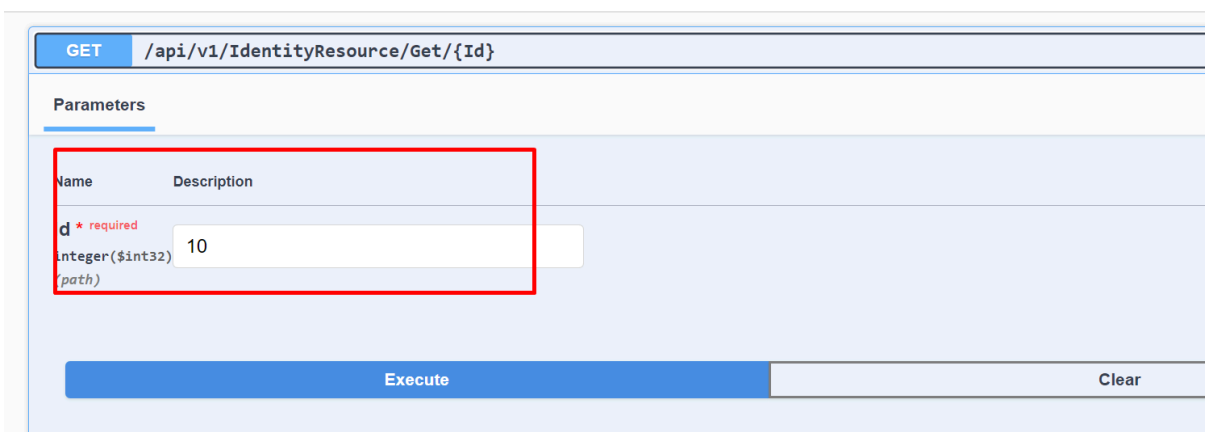

Execute Clear

Responses

2.Actual Result:- if trying to get the data of resources by invalid ID or Null value ,it is returning 200 success with body ,resource as null and message as null.

Expected Result:- it should return code 400 bad request,with message showing invalid value.

3.Actual Result:- if trying to create a new resource ,it is getting created with 200 ok status code and no message or null. Also there is no sequence of resource id ,it is generating random value.

Expected result:- It should return 201 created as status code, and should display a message of “Created Successfully”.

Request body

```
{
  "enabled": true,
  "name": "srhdh2",
  "displayName": "",
  "description": "",
  "resourceClaims": [
    ""
  ],
  "resourceScopes": [
    ""
  ]
}
```

Code

Details

200

Response body

```
{
  "isSuccess": true,
  "message": null,
  "response": {
    "resourceId": 23
  },
  "code": "ApiResource_Insert_Success"
}
```

UI bugs Admin site- It should be scope ID not Resource ID

Resource ID	Scope Name	Scope display Name	Description	Status
1	Accounts	Wiseliy.Accounts.API		Enabled
2	Staff	Wiseliy.Staff.API		Enabled
3	Work	Wiseliy.Work.API		Enabled
4	Files	Wiseliy.Files.API		Enabled
5	Admin	Wiseliy.Admin.API		Enabled
6	Pay	Wiseliy.Pay.API		Enabled

Identity Scope API Bugs

1.Actual Result-: All the endpoints of this controller are returning message null with 200 status code.

Expected Result-: it should return a message of success. Also for creating API it should return 201 Created .

CURRENT-:

Code	Details
200	<div>Response body<pre>{ "isSuccess": true, "message": null, "response": { "scopeId": 31 }, "code": "APIScope_Update_Success"} </pre></div> <div>Response headers</div>

2.Actual Result-: When trying to remove scope with scope ID working fine, but if providing Invalid Scope ID then also it is returning status as 200 and message code as removed successfully.if Removing with valid ID then it should return 204 No content.

Expected Result-: if providing invalid then it should return 404 as code and message as ID does not exist.

CURRENT-:
